RE: Materials To Support February 4, 2002 Meeting – 245 E. Ohio Street

Dear Fred:

Enclosed please find five (5) copies of the following materials we are providing to support the February 4, 2003 meeting to further discuss the 245 East Ohio Street property:

- Meeting Agenda;
- Closure Letter Talking Points Document; and
- Table of Contents for a Work Plan to be developed by Conestoga-Rovers & Associates ("CRA").

As mentioned by Bruce Clegg, we will also be providing the Agency with five (5) copies of a Phase I Report (four (4) bound and one (1) unbound) on Tuesday, February 21, 2003. Please have Mary Fulghum advise us what time on the morning of February 4, 2003 the Agency would like to meet, as well as what floor / conference room we should come to at your offices. Feel free to call me with any questions.

Very truly yours,

Thomas R. Carey

**245 EAST OHIO REMEDIATION
SECOND U.S. EPA MEETING**

February 4, 2003

AGENDA

I. U.S. EPA Information Request Status Discussion

The initial meeting between U.S. EPA and the potential 245 E. Ohio Street development parties (Fairbanks Development Group) was held on November 19, 2002. During that meeting additional materials were requested by U.S. EPA. The requested materials and the dates the materials were provided to U.S. EPA representatives are reflected in the table below:

Material Requested	USEPA Requester	Status
Sanborn Fire Insurance Maps for the Fairbanks Property	Mary Fulghum	Sent by CRA to USEPA on Wednesday, November 20, 2002.
City Condemnation Materials concerning 15 feet of property along Fairbanks Street in 1980.	Mary Fulghum	(i) Petition to Condemn and Amendment to Petition to Condemn sent from Funkhouser to Fulghum by e-mail (Adobe Format) on Wednesday, November 20, 2002; and (ii) Order on Petition to Condemn sent from Funkhouser to Fulghum by e-mail (Adobe Format) on Monday, November 25, 2002.
Copy of CRA Walkover Thorium Survey	Fred Micke	Sent by CRA to USEPA (Fred Micke) by overnight mail on Wednesday, December 4, 2002.
Conversion factor from pCi/gm to counts per minute for CRA's thorium survey.	Fred Micke	Provided by CRA via e-mail to U.S. EPA on Wednesday, December 4, 2002.

NOTE: U.S. EPA representative, Mary Fulghum also requested photographs of pure thorium product ("peanut butter-like consistency") whenever such was encountered during thorium remediation activities.

II. Thorium Remediation Outline

During the November 19, 2002 meeting, Fairbanks Development Group presented its conceptual thorium remediation plan to the U.S. EPA. Based upon U.S. EPA's initial input at the meeting, the Fairbanks Development Group will present its revised thorium remediation work plan by way of a presentation of the Draft Work Plan Table of Contents, followed by the following discussion topics:

- Does the Draft Work Plan reflect a thorium remediation process that meets U.S. EPA's basic requirements / expectations.
- What specific changes, edits, etc. will the U.S. EPA seek – if any?
- If the Fairbanks Development Group finds themselves similarly situated to the Teachers site (*e.g.* side slope shoring required), will the U.S. EPA permit thorium bore hole sampling to confirm that side slopes are thorium-free?
- A discussion of Work Plan Amendment / dispute resolution procedures.
- Work Plan development scheduling.
- U.S. EPA's Work Plan review and approval procedures.
- Clarification of level of thorium investigation and removal from beneath sidewalks and adjacent rights of ways. Address situation where shoring used prevents thorium scanning on adjacent sidewalks.
- Coordination with City of Chicago and its subsurface utility / construction requirements.

III. Administrative Process Issues

- Remediation process discussion – returning site to covered status pending initiation of construction activities.
- The U.S. EPA issued a Unilateral Administrative Order for the River East and Grand Pier Sites, but not for the Teachers site. Will U.S. EPA seek to amend the current River East UAO to include the 245 East Ohio Street property? What steps must be taken to avoid such a situation? Issuance of an amended UAO for the 245 E. Ohio Street property would be very detrimental to property development activities.
- Innocent landowner designation discussion. Discuss process for U.S. EPA to render a decision in this regard? What form will the decision take?
- Bona Fide Prospective Purchaser status: will U.S. EPA issue a written confirmation?

IV. Closure Letter and U.S. EPA Assurances

- The type of closure letter that U.S. EPA will agree to provide the Fairbanks Development Group will have a bearing on project financing. Commitment from Agency to agree in principal to type and degree of approval at or about the time the Agency approves of the Work Plan.
- Unlike the River East and Grand Pier properties, any closure letter will not be necessary to address an underlying UAO.
- Status of Teachers site closure letter. Has it been drafted yet? If not, what does the U.S. EPA envision the Teachers closure letter will reflect?
- At a minimum, the Fairbanks Development Group would require that a closure letter for the Fairbanks Property would contain provisions such as: (i) no EPA deed restrictions or liens; (ii) affirmative statement that the property can be developed for residential use; (iii) confirmation that the remediation was completed in accordance with the Work Plan and in accordance with all applicable law and U.S. EPA practices and guidance. *See* attached discussion document for additional provisions.

IV. Coordination With Kerr-McGee

- Discussion of coordination of remediation efforts between Fairbanks Development Group and Kerr-McGee;
- Discussion of leverage that the U.S. EPA will utilize in ensuring that costs of transportation and disposal will be borne by Kerr-McGee;
- Discussion of how U.S. EPA envisions Kerr-McGee's role in development and approval of the Work Plan.

V. Phase I Report Discussion

VI. Work Plan Development and Remediation Scheduling

- Table of Contents
- Discussion of Work Plan development schedule.
- Discussion of U.S. EPA's ability to work within proposed Work Plan development schedule.
- Discussion of post-Work Plan remediation schedule and U.S. EPA's ability to work within the Fairbanks Development Group's proposed remediation schedule.

BELL, BOYD & LLOYD LLC

U.S. EPA Approval / Closure Letter Principals

Listed below are a number of items contemplated for discussion regarding the closure letter to be issued by the United States Environmental Protection Agency (EPA) upon Draper & Kramer's (D&K) completion of the necessary work at the 245 East Ohio Street property (Site). These items are included to demonstrate the types of protections that potential investors and lenders may wish to see in order to establish a minimum comfort level necessary to proceed with Site development activities.

- No EPA deed restrictions or liens – a clean property title will likely be required to support development efforts.
- EPA's written approval for ultimate residential use – the property will ultimately be developed for mixed residential / commercial use. EPA's confirmation that residential use can be pursued will support development efforts.
- EPA's written approval of the Work Plan. EPA's written confirmation that the Agency has reviewed, agreed to, and accepted the provisions of the Work Plan will support Site development activities.
- EPA's written confirmation that Work Plan was followed by D&K will support Site development activities (*e.g.* written confirmation by the Agency that EPA conducted sufficient oversight of the project and that the Agency agrees that D&K followed terms and conditions of the Work Plan).
- EPA's written confirmation of the Final Report will support Site development activities. D&K anticipates providing EPA with a Final Report describing the activities conducted by D&K in following the Work Plan to remove thorium from the Site. EPA's confirmation that it has reviewed the Final Report and agrees with the description of activities and the results of those activities as set forth therein will support Site development activities.
- Written confirmation that the Work Plan sufficiently addressed other potential contaminants will support Site development activities (*e.g.* written certification from EPA that D&K's consultants conducted sufficient testing to discover other potential contaminants at the Site other than thorium will also help establish a comfort level for potential investors and lenders).
- No re-opener and a no action guarantee for thorium and any other present contamination at the Site will help foster Site development activities (*e.g.* written certification from EPA that thorium has been adequately removed from the Site and therefore, EPA will not pursue additional legal actions against D&K, now or in the future, for thorium and any other contamination at the Site will help establish a comfort level for potential investors and lenders).

- Written confirmation from EPA that D&K meets the criteria of a bona fide prospective purchaser¹ provided in CERCLA § 101(40) will greatly help foster Site development activities.
- A written confirmation from EPA that the Agency will not seek from D&K, now or in the future, any unrecovered response costs pursuant to CERCLA § 107(r) (“windfall lien”) will help establish a comfort level for potential investors and lenders and will help foster Site development activities.
- A written confirmation from EPA that D&K’s work at the Site sufficiently addresses any potential outstanding issues under EPA’s RCRA program will help establish a comfort level for potential investors and lenders, as well as help foster Site development activities.
- A written confirmation from EPA that the environmental concerns of all Illinois or City of Chicago regulatory agencies are sufficiently addressed by D&K’s remediation work will help foster subsequent Site development activities.
- A written acknowledgement from EPA that significant public and environmental benefits will be derived from D&K’s activities at the Site will help foster Site development activities.
- Written confirmation that the work conducted at the Site is consistent with any EPA intergovernmental agreements that may encompass the Site (*e.g.* memorandum of understanding with the Illinois Environmental Protection Agency, Illinois Department of Nuclear Safety, City of Chicago, etc.) will help foster Site development activities.
- Written affirmation by EPA that all work performed at the Site is compliant with all applicable laws, guidance documents, etc., to the limits of EPA’s knowledge, oversight, etc. will provide comfort to potential investors and lenders and will help foster Site development activities.

TWK:lac
343348v.2

¹ Obtaining bona fide prospective purchaser status resolves a number of significant factual and legal issues. EPA acknowledges that: (1) disposal at the Site occurred prior to acquisition; (2) D&K made appropriate inquiry into previous ownership and uses of the Site in accordance with generally accepted practices; (3) all legal notices with respect to contamination found at the Site were provided to EPA; (4) “appropriate care” was exercised by D&K with respect to the contamination; (5) D&K provided full cooperation and access to the Site; (6) D&K is in compliance with any land use restrictions; (7) D&K has complied with any information request or administrative subpoena issued by EPA; and (8) D&K is not potentially liable for any response costs at the Site.

EXECUTIVE SUMMARY

Conestoga-Rovers & Associates (CRA) was retained by Bell Boyd & Lloyd and Funkhouser Vegosen Liebman & Dunn Ltd. to complete a Phase I Environmental Site Assessment (ESA) of an active pay parking lot and several structures located at the southwest corner of East Ohio Street and North Fairbanks Court in Chicago, Illinois (Property or Site). The purpose of the Phase I ESA was to identify Recognized Environmental Conditions, as defined in ASTM Standard E1527-00, existing at the Site. This ESA was conducted to assist Bell Boyd & Lloyd and Funkhouser Vegosen Liebman & Dunn Ltd. in evaluating the business environmental risk, as defined in ASTM E1527-00, at the Site. The Phase I ESA Site inspection was conducted by CRA on October 11, 2002.

The Site consists of an approximately 32,700-square foot active pay parking lot, a fast food restaurant (Hot Diggity Dog), a vacant metal building, and an attendant's booth for the parking lot attendants. Based on documentation reviewed by CRA, several addresses have been used for the Site including the following: 253 East Ohio Street, 251 East Ohio Street (currently Hot Diggity Dog), 247 East Ohio Street (currently vacant metal building), 245 East Ohio Street, 243 East Ohio Street, and 242 to 256 East Grand Avenue. Based on documentation reviewed by CRA, a filling station historically occupied the northern portion of the Site circa 1950 until 1975. Based on a review of Sanborn Maps, a warehouse and garage occupied the southern portion of the Site circa 1950 until sometime between 1950 and 1974. According to Site personnel, a horse barn historically occupied the Site sometime in the 1940s.

Based on the Phase I ESA including the Site inspection, database search, historic records reviewed, information provided by Site personnel, and interviews, the following potential Recognized Environmental Conditions, as defined in the ASTM Standard E1527-00, were identified at the Site:

**POTENTIAL CURRENT RECOGNIZED
ENVIRONMENTAL CONDITIONS**

- i) **On-Site Soil Contamination (Thorium):** The Site is located near the Lindsay Light Superfund Site and the Lindsay Light II Site where soils containing radioactive thorium have been previously reported. The presence of soils

**PRIVILEGED & CONFIDENTIAL
SUBJECT TO ATTORNEY-CLIENT PRIVILEGE**

containing elevated levels of radioactive thorium on the Property was confirmed during an investigation completed by CRA in February 2001. Subsequently, CRA conducted a Property Investigation at the Site in April 2001 to evaluate the Property from the perspective of assessing subsurface radiation relative to naturally occurring background radiation levels in local unimpaired soils and to evaluate the potential volume of soil containing elevated radiation levels. The results of the June 2001 investigation confirmed the presence of radioactive materials in the soil in at least two areas along the western portion of the Site at levels above the cleanup level established by the United States Environmental Protection Agency (USEPA) for the Lindsay Light Site (7.1 pCi/g total radium).

- ii) **Solid Waste:** Significant amounts of fill material are known to have been added historically to raise the grade of city streets above the original natural marshy ground. It is probable that the Site is underlain by general fill material dating from the 19th century. Also, the Site is located in an area that was destroyed during the Great Chicago Fire of 1871, which typically resulted in the presence of polynuclear aromatic hydrocarbons (PNAs) being present. The nature and quality of fill material at the Site are *unknown at present*. However, varying amounts of rubble consisting of brick fragments, concrete and minor amounts of slag, coal, glass, and wood were identified in soil borings advanced at the Site during a limited Property Investigation conducted by CRA in April 2001.

**POTENTIAL HISTORIC RECOGNIZED
ENVIRONMENTAL CONDITIONS**

- i) **Former On-Site Filling Station:** A filling station was historically located at the Site. Based on documentation reviewed by CRA, one 1,000-gallon and two 550-gallon USTs were removed from the Site in February 1994. Upon removal of the USTs, petroleum-degraded soils were observed by an inspector from the Office of the State Fire Marshall (OSFM). In accordance with State and Federal regulations, a release was reported to the Illinois Emergency Management Agency (IEMA) and incident number 94-0293 was issued for the Site. The Site was listed in the LUST Report as Dancona & Company located at 247 East Ohio Street and was reported as having an open status.
- ii) **Northern Adjacent Property USTs:** Three separate filling stations historically occupied the property across E. Ohio Street to the north of the Site at the

**PRIVILEGED & CONFIDENTIAL
SUBJECT TO ATTORNEY-CLIENT PRIVILEGE**

northwest corner of East Ohio Street and North Fairbanks Court circa 1950 until sometime between 1988 and 1990. Amoco Oil Company #5911 historically located at 252 East Ohio Street was listed in the Illinois UST Report as having three removed USTs and was listed in the Illinois LUST Report as having been issued a No Further Action (NFA) letter. While residuals may be present at the former Amoco Oil Company site, the NFA letter would indicate that levels remaining and available exposure pathways would not impact adjacent properties to an extent creating a concern to the State.

- iii) **Eastern Adjacent Property USTs:** A filling station historically occupied the property across N. Fairbanks Court to the east of the Site at the southeast corner of East Ohio Street and North Fairbanks Court circa 1950 until sometime between 1950 and 1974. No investigation or testing data is available with which to evaluate whether potential releases from the filling station UST(s) have adversely impacted soils or groundwater at the Site.
- iv) **Potential Adjacent Property USTs:** A vacant parking lot historically located at 255 East Ohio Street was listed in the UST Report as having three removed USTs. Although the vacant parking lot was not listed in the Illinois LUST Report as having any releases, no investigation or testing data is available with which to evaluate whether potential releases from the USTs have adversely impacted soils or groundwater at the Site. Moreover, CRA is unable to determine the exact location of this vacant parking lot.

CONCLUSIONS

CRA has completed a Phase I Environmental Site Assessment of an active pay parking lot located at the southwest corner of East Ohio Street and North Fairbanks Court located in Chicago, Illinois in conformance with the scope and limitations of ASTM Practice E1527-00. Any exceptions to or deletions from this practice are described in Section 1.0 of this report. This assessment did not identify any Recognized Environmental Conditions at this Site, with the exception of the following:

- **On-Site Soil Contamination (Thorium)**
- **Solid Waste (historic city grading activities/Great Chicago Fire)**
- **Former On-Site Filling Station**
- **Eastern Adjacent Property USTs**

**PRIVILEGED & CONFIDENTIAL
SUBJECT TO ATTORNEY-CLIENT PRIVILEGE**

- **Potential Adjacent Property USTs**
- **Northern Adjacent Property USTs**

**PRIVILEGED & CONFIDENTIAL
SUBJECT TO ATTORNEY-CLIENT PRIVILEGE**

1.0 INTRODUCTION

Conestoga-Rovers & Associates (CRA) was retained by Bell Boyd & Lloyd and Funkhouser Vegosen Liebman & Dunn Ltd. to complete a Phase I Environmental Site Assessment (ESA) of an active pay parking lot located at the southwest corner of East Ohio Street and North Fairbanks Court in Chicago, Illinois (Property or Site). The purpose of the Phase I ESA was to identify Recognized Environmental Conditions, as defined in ASTM Standard E1527-00, existing at the Site. This ESA was conducted to assist Bell Boyd & Lloyd and Funkhouser Vegosen Liebman & Dunn Ltd. in evaluating the business environmental risk, as defined in ASTM E1527-00, at the Site. The Phase I ESA Site inspection was conducted by CRA on October 11, 2002. A Site location map is provided as Figure 1. A Site plan is provided as Figure 2.

The Site consists of an approximately 32,700-square foot active pay parking lot, a fast food restaurant (Hot Diggity Dog), a vacant metal building, and an attendant's booth for the parking lot attendants. Based on documentation reviewed by CRA, several addresses have been used for the Site including the following: 253 East Ohio Street, 251 East Ohio Street (currently Hot Diggity Dog), 247 East Ohio Street (currently vacant metal building), 245 East Ohio Street, 243 East Ohio Street, and 242 to 256 East Grand Avenue. Based on documentation reviewed by CRA, a filling station historically occupied the northern portion of the Site circa 1950 until 1975. Based on a review of Sanborn Maps, a warehouse and garage occupied the southern portion of the Site circa 1950 until sometime between 1950 and 1974. According to Site personnel, a horse barn historically occupied the Site sometime in the 1940s.

The Phase I ESA was conducted in general accordance with ASTM Standard E 1527-00 for conducting environmental assessments. The assessment included an environmental database search, historical records review, a Site inspection of accessible areas, a review of relevant Site records made available to CRA, and interviews with individuals associated with the Site. No exceptions to ASTM E1527-00 were taken during this Phase I ESA. This Phase I ESA was prepared by Kelly Connolly and Brian Boevers of CRA. Copies of curriculum vitae outlining their qualifications are contained in Appendix A.

The following tasks were conducted during the assessment:

PRIVILEGED & CONFIDENTIAL
SUBJECT TO ATTORNEY-CLIENT PRIVILEGE

- review of Federal and State environmental databases and historical records;
- review of aerial photographs of the Site;
- review of past and current property use and adjacent property occupancy;
- inspection of the facilities, equipment, utility services, operations, and associated Site records;
- observations of conditions that represented potential environmental concerns;
- review of chemical use and storage and spill/release incidents;
- observations of potential asbestos containing materials (ACM);
- review of the results of prior inspections conducted at the Site;
- review of waste handling, accumulation, storage, and disposal practices;
- review of air emissions and wastewater discharges;
- review of equipment that potentially contain polychlorinated biphenyls (PCBs);
- review of aboveground and underground storage tank records; and
- review of previous environmental reports regarding the Site.

CRA relied on information received from regulatory agency and Site personnel as accurate unless contradicted by written documentation or field observations.

The following report summarizes the information gathered by CRA during the Phase I ESA and identifies Recognized Environmental Conditions, as defined in ASTM Standard E1527-00.

The Phase I ESA has been prepared for the use of Bell Boyd & Lloyd and Funkhouser Vegosen Liebman & Dunn Ltd. and may not be relied upon by any other party without written consent from CRA.

**PRIVILEGED & CONFIDENTIAL
SUBJECT TO ATTORNEY-CLIENT PRIVILEGE**

**2.0 ENVIRONMENTAL DATABASES SEARCH
AND HISTORICAL RECORDS REVIEW**

2.1 ENVIRONMENTAL DATABASES SEARCH

CRA contracted Environmental Data Resources, Inc. (EDR) to conduct a search of federal and state environmental databases. Based on the address of the Site, the database searches were completed to assist in the identification of conditions at the Site and within a radius distance specified in ASTM Standard E1527-00. A copy of the database search is included as Appendix B. The following databases were searched with the findings as follows:

2.1.1 FEDERAL DATABASES

1. National Priority List (NPL) - The NPL is a United States Environmental Protection Agency (USEPA) listing of the nation's worst uncontrolled or abandoned hazardous waste sites. NPL Sites are targeted for possible long-term remedial action under the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) of 1980. In addition, the NPL Report includes information concerning cleanup agreements between the USEPA and potentially responsible parties, any liens filed against contaminated properties, as well as the past and current USEPA budget expenditures tracked within the Superfund Consolidated Accomplishments Plan (SCAP).

FINDING: According to the databases searched, the Site was not on the NPL. No sites within a one-mile radius of the Site were on the NPL.

2. Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) - The CERCLIS List contains data on potentially hazardous waste sites that may have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the NPL and sites which are in the screening and assessment phase for possible inclusion on the NPL.

**PRIVILEGED & CONFIDENTIAL
SUBJECT TO ATTORNEY-CLIENT PRIVILEGE**

FINDING: According to the databases searched, the Site was not on the CERCLIS List. One adjacent site was on the CERCLIS List, this being Lindsay Light II located at 316 East Illinois Street. No other sites within a half-mile radius of the Site were on the CERCLIS List.

3. No Further Remedial Action Planned Sites Report (NFRAP) – As of February 1995, CERCLIS sites designated "No Further Remedial Action Planned" have been removed from CERCLIS. NFRAP sites may be sites where, following an initial investigation, no contamination was found, contamination was removed quickly without the need for the site to be placed on the NPL, or the contamination was not serious enough to require Federal Superfund Action or NPL consideration. EPA has removed approximately 25,000 CERCLIS sites to lift the unintended barriers to the redevelopment of these properties and has archived them as historical records so EPA does not needlessly repeat the investigations in the future. This policy change is part of the EPA's Brownfields Redevelopment Program to help cities, states, private investors and affected citizens to promote economic redevelopment of unproductive urban sites.

FINDING: According to the databases searched, the Site was not listed in the NFRAP Sites Report. No adjacent sites were listed in the NFRAP Sites Report. The following sites within a half-mile radius of the Site were listed in the NFRAP Sites Report:

<u>Facility</u>	<u>Address</u>
General Parking Corporation	341 East Ohio Street
Great Lakes Limited Partnership	505 N. Lakeshore Drive
Lindsay Light III	22 West Hubbard

4. Resource Conservation and Recovery Information System (RCRIS) - Non-Corrective Action Treatment, Storage and Disposal (TSD) Facilities Report - The RCRIS-TSD Report contains information regarding these facilities that either treat, store or dispose of USEPA-regulated hazardous waste. The following information also is included in the RCRIS-TS Report: information regarding the status of facilities tracked by the Resource Conservation and Recovery Act (RCRA) Administrative Action Tracking System (RAATS); inspections and evaluations conducted by Federal and State Agencies; all reported facility violations, the environmental statutes violated and any proposed and actual

**PRIVILEGED & CONFIDENTIAL
SUBJECT TO ATTORNEY-CLIENT PRIVILEGE**

penalties; and a complete listing of USEPA-regulated hazardous wastes which are generated or stored on site.

FINDING: According to the databases searched, the Site was not listed in the RCRIS-TSD Report. No sites within a one-mile radius of the Site were listed in the RCRIS-TSD Report.

5. Resource Conservation and Recovery Act (RCRA) - Corrective Action (CORRACTS) Report - The CORRACTS Report contains information pertaining to hazardous waste treatment, storage and disposal facilities (RCRA TSDs) which have conducted or are currently conducting corrective actions as regulated by the Resource Conservation and Recovery Act. The following information also is included in the CORRACTS Report: information regarding the status of facilities tracked by the RAATS; inspections and evaluations conducted by Federal and State Agencies; all reported facility violations, the environmental statutes violated and any proposed and actual penalties; information pertaining to corrective actions undertaken by the facility or the USEPA; and a complete listing of USEPA-regulated hazardous wastes which are generated or stored on site.

FINDING: According to the databases searched, the Site was not listed in the CORRACTS Report. No adjacent sites were listed in the CORRACTS Report. One site within a one-mile radius of the Site was listed in the CORRACTS Report, this being General Parking Corporation located at 341 East Ohio Street.

6. Resource Conservation and Recovery Information System - Large Quantity Generators (RCRIS-LQG) Report - The RCRIS-LQG Report contains information regarding facilities that either generate more than 1,000 kilograms (kg) of USEPA-regulated hazardous waste per month or meet other applicable requirements of RCRA. The following information also is included in the RCRIS-LQG Report: information regarding the status of facilities tracked by the RAATS; inspections and evaluations conducted by Federal and State Agencies; all reported facility violations, the environmental statutes violated and any proposed and actual penalties; information pertaining to corrective actions undertaken by the facility or the USEPA; and a complete listing of USEPA-regulated hazardous wastes which are generated or stored on site.

FINDING: According to the databases searched, the Site was not listed in the RCRIS-LQG Report. No adjacent sites were listed in the RCRIS-LQG Report.

**PRIVILEGED & CONFIDENTIAL
SUBJECT TO ATTORNEY-CLIENT PRIVILEGE**

The following sites within a quarter-mile radius of the Site were listed in the RCRIS-LQG Report:

<u>Facility</u>	<u>Address</u>
General Parking Corporation	341 East Ohio Street
Compass Management and Leasing	455 North City Front Plaza

One site was listed in the RCRIS-LQG Report, but could not be located with respect to the Site due to incomplete address information, this being W Hotel located at 644 North Lake Shore Drive.

7. Resource Conservation and Recovery Information System - Small Quantity Generators (RCRIS-SQG) Report - The RCRIS-SQG Report contains information regarding facilities that either generate between 100 kg and 1,000 kg of USEPA-regulated hazardous waste per month or meet other applicable requirements of RCRA. The following information also is included in the RCRIS-SQG Report: information regarding the status of facilities tracked by the RAATS; inspections and evaluations conducted by Federal and State Agencies; all reported facility violations, the environmental statutes violated and any proposed and actual penalties; information pertaining to corrective actions undertaken by the facility or the USEPA; and a complete listing of USEPA-regulated hazardous wastes which are generated or stored on site.

FINDING: According to the databases searched, the Site was not listed in the RCRIS-SQG Report. The following adjacent sites were listed in the RCRIS-SQG Report:

<u>Facility</u>	<u>Address</u>
Holiday Inn	300 East Ohio Street
Time Life Building	541 North Fairbanks

**PRIVILEGED & CONFIDENTIAL
SUBJECT TO ATTORNEY-CLIENT PRIVILEGE**

The following other sites within a quarter-mile radius of the Site were listed in the RCRIS-SQG Report:

<u>Facility</u>	<u>Address</u>
Skyview Film and Video, Inc.	541 North Fairbanks Court
NWI Land Management Corp.	341 East Ohio Street
Velsicol Chemical Corp.	341 East Ohio Street
Creative Displays	230 East Ohio Street
McClurg Court Partnership	333 East Ontario
Stats IT, Inc.	200 East Ohio Street
Bregy Cleaners	542 North St. Clair
Editel Chicago	301 East Erie Street
VA/Chicago Lakeside DIV-MSB	400 East Ontario
CBS Television Stations	630 North McClurg Court
Lakeshore Ontario Associates	401 East Ontario
IJM Management	420 East Ohio Street
Andres Fotolab	160 East Illinois Street
Kieffer-Nolde, Inc.	160 East Illinois Street
Columbia Label Corp.	431 East Illinois Street
Veterans Administration Research	333 East Huron Street
Sheraton Hotel	301 East North Water Street
Marriott Hotel	540 North Michigan Avenue
InterContinental Hotel	525 North Michigan Avenue
Northwestern Memorial Hospital	710 North Fairbanks
Avenue Edit Corp.	625 North Michigan Avenue
Hotel InterContinental	505 North Michigan Avenue
Rubloff	500 North Michigan Avenue
Revere Sugar Corp.	330 East North Water Street
Navy Pier	600 East Grand Avenue

**PRIVILEGED & CONFIDENTIAL
SUBJECT TO ATTORNEY-CLIENT PRIVILEGE**

<u>Facility</u>	<u>Address</u>
Rreef	645 North Michigan Avenue
Optimus, Inc.	161 East Grand Avenue
Edit Chicago Video, Inc.	160 East Grand Avenue
Wisconsin Investment Board	669 North Michigan Avenue

The following sites were listed in the RCRIS-SQG Report, but could not be located with respect to the Site due to incomplete address information:

<u>Facility</u>	<u>Address</u>
Giampietro Nicholas	1150 North Lake Shore Drive
Northwestern University Medical Center	680 North Lake Shore Drive
MWRDGC Mel Centennial Fountain	373 East River Drive
North Chicago River Control Works	108 North Streeter Drive

8. Emergency Response Notification System - ERNS records and stores information on reported releases of oil and hazardous substances.

FINDING: According to the databases searched, the Site was not listed in the ERNS.

9. Toxic Chemical Release Inventory System (TRIS) - The TRIS Database identifies facilities which release toxic chemicals to the air, water and land in reportable quantities under SARA Title III Section 313.

FINDING: According to the databases searched, the Site was not listed in the TRIS Database. No sites within a half-mile radius of the Site were listed in the TRIS Database.

2.1.2 STATE DATABASES

1. Underground Storage Tank (UST) Database – USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA) and must be registered with the state department responsible for administering the UST program. Available information varies by state program.

**PRIVILEGED & CONFIDENTIAL
SUBJECT TO ATTORNEY-CLIENT PRIVILEGE**

FINDING: According to the databases searched, the Site was not listed in the UST Database. The following adjacent sites were listed in the UST Database:

<u>Facility</u>	<u>Address</u>	<u>Number of Tanks</u>	<u>Status</u>
Amoco Service Station	252 E. Ohio	3	Removed
Vacant Parking Lot	255 E. Ohio	3	Removed

The following other sites within a quarter-mile radius of the Site were listed in the UST Database:

<u>Facility</u>	<u>Address</u>	<u>Number of Tanks</u>	<u>Status</u>
Schatz Properties	610 N. Faribanks Ct.	1	Exempt
River East Center	316 E. Illinois	2	Exempt
Parking Lot	470 E. Grand Ave.	1	Exempt
Construction Site	200 E. Illinois	6	Exempt
CBS, Inc.	630 N. McClurg St.	2	Exempt
Medical Science Building	400 E. Ontario	1	Removed
		1	In Use
Building Site	165 E. Ontario	2	Exempt
VA Lakeside Medical Center	333 E. Huron St.	2	Abandoned
		1	Removed
		5	In Use
		2	Exempt
Chicago Mariott Downtown	540 N. Michigan Ave.	1	In Use
		1	Does Not Exist
Parcel 6B	315 E. N Water Street	1	Exempt
Not Reported	520 N. Michigan	1	Exempt
Northwestern Memorial Hosp.	710 N. Faribanks Ct.	1	In Use
Vacant Store	620 N. Michigan Ave.	1	Exempt
Onterie Center	446 E. Ontario	1	Abandoned

**PRIVILEGED & CONFIDENTIAL
SUBJECT TO ATTORNEY-CLIENT PRIVILEGE**

<u>Facility</u>	<u>Address</u>	<u>Number of Tanks</u>	<u>Status</u>
Rreef MidAmerica Fund III	645 N. Michigan Ave.	2	Abandoned
Neomedica, Inc.	450 E. Ohio St.	2	Exempt
Central Utility Plant	410 E. Huron St.	5	Removed
		3	In Use
Prentice Women's Hospital	333 E. Superior St.	1	In Use
Rehabilitation Institute	345 E. Superior St.	1	In Use
Superior Street Garage	259 E. Superior St.	1	Removed

One site was listed in the UST Database, but could not be located with respect to the Site due to incomplete address information, this being Chicago NBC Tower LP located at 455 North City Front Plaza Drive.

2. Leaking Underground Storage Tank Sites (LUST) Report - The LUST Report contains an inventory of reported leaking underground storage tank incidents. Not all states maintain these records, and the information stored varies by State.

FINDING: According to the databases searched, the Site address (247 East Ohio Street) was listed in the LUST Report as Dancona & Company and was reported as having an open status (see Section 3.4). One adjacent site was listed in the LUST Report, this being Amoco Oil Company located at 252 East Ohio Street, which was reported as having a closed status.

The following other sites within a half-mile radius of the Site were listed in the LUST Report:

<u>Facility</u>	<u>Address</u>	<u>Status</u>
Chicago Dock & Canal Trust	316 E. Illinois St.	Open
MCL, Inc.	300 E. Illinois St.	Open
Grand Piper Center	200 E. Illinois St.	Open
VA Research Headquarters	333 E. Huron St.	Open
Northwestern Memorial	710 Fairbanks	Closed
SIMS Ltd.	505 North Michigan Ave.	Open

**PRIVILEGED & CONFIDENTIAL
SUBJECT TO ATTORNEY-CLIENT PRIVILEGE**

<u>Facility</u>	<u>Address</u>	<u>Status</u>
Neomedica, Inc.	450 E. Ohio St.	Closed
Northwestern University	410 E. Huron St.	Closed
Northwestern University	259 E. Huron St.	Open
Chicago, City of	510 N. Peshtigo Ct.	Open
Hiffman Schaffer Anderson	6030 N. Rush St.	Open
Days Inn Hotel at Chicago	644 N. Lake Shore Dr.	Open
William I. Wrigley Co.	410 N. Rush St.	Closed
Illinois Dept. of Military	234 E. Chicago Ave.	Closed
Hyatt Regency of Chicago	203 E. Wacker Dr.	Closed
Streeterville Corp.	215 E. Chicago Ave.	Closed
American Red Cross	43 E. Ohio St.	Open
Park Hyatt Hotel	800 N. Michigan Ave.	Closed
Northwestern Memorial Hospital	244 E. Pearson St.	Open
Lakeshore Drive Trust	860 Lake Shore Dr.	Open
Lincoln National Investment Co.	747 N. Wabash Ave.	Closed
Condominium	247 E. Chestnut	Closed
TAJ International Hotels	71 E. Wacker Dr.	Closed
The Hertz Corp.	9 W. Kinzie St.	Closed
Hertz Corp.	9 W. Kinzie St.	Open
Ontario Dearborn Shell	30 W. Ontario	Closed
Equilon Enterprises	30 W. Ontario	Open
Market Reporting Service	15 W. Huron St.	Closed
Condo Association	253 E. Delaware Pl.	Closed
Dearborn East Partnership, LP	600-625 N. Dearborn Pl.	Open
Loyola University	41 E. Pearson	Open

**PRIVILEGED & CONFIDENTIAL
SUBJECT TO ATTORNEY-CLIENT PRIVILEGE**

The following sites were listed in the LUST Database, but could not be located with respect to the Site due to incomplete address information:

<u>Facility</u>	<u>Address</u>
The Chicago & N.E. II District Counsel	#2 East Erie Street
Chicago Dock & Canal Trust	315 East North Waters Street

3. Solid Waste Facility List - The Solid Waste Facility List contains an inventory of solid waste disposal facilities or landfills in a particular state. Depending on the state, these may be active or inactive facilities or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites.

FINDING: According to the databases searched, the Site was not on the Solid Waste Facility List. No sites within a half-mile radius of the Site were on the Solid Waste Facility List.

4. State Hazardous Waste Sites List - State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS List. Priority sites planned for cleanup using state funds are identified along with sites where cleanup will be paid for by the potentially responsible parties. Available information varies by state.

FINDING: According to the databases searched, the Site was not on the State Hazardous Waste Sites List. No sites within a half-mile radius of the Site were on the State Hazardous Waste Sites List.

5. Illinois Category List - Sites on the Illinois Category List include Notice of Response Action, NPL, Pre/proposed NPL, Completed Remedial Action, Site Remediation Program, Federal Facilities, and Cleanup Started and/or Completed Sites.

FINDING: According to the databases searched, the Site was not on the Illinois Category List. No adjacent sites were on the Illinois Category List. The following sites within a one-mile radius of the Site were on the Illinois Category List:

<u>Facility</u>	<u>Address</u>
Lake Shore Ontario Association	401 East Ontario Street

**PRIVILEGED & CONFIDENTIAL
SUBJECT TO ATTORNEY-CLIENT PRIVILEGE**

<u>Facility</u>	<u>Address</u>
Not Reported	420 East Ohio Street
North Pier Apartment	420 East Ohio Street

6. Site Remediation Program Database – The SRP Database identifies the status of all voluntary remediation projects administered through the pre-notice site cleanup program (1989 to 1995) and the site remediation program (1996 to the present).

FINDING: According to the databases searched, the Site was not listed in the SRP Database. No adjacent sites were listed in the SRP Database. The following sites within a one-mile radius of the Site were listed in the SRP Database:

<u>Facility</u>	<u>Address</u>
Schatz Property	247 E. Ontario Street
Bregy Cleaners	542 N. St. Clair Street
Northwestern Memorial Hospital	244 E. Pearson Street
American Hospital	250 E. Pearson Street
American Medical Association	551 N. Dearborn Street
Grand Plaza, LLC	535 N. Dearborn Street
B&B Investors	601-625 N. Dearborn
Navy Pier	Streeter Drive/East G Street
Blood Systems, Inc.	121 N. LaSalle Street
Peoples Gas and Light	409-431 W. Superior Street
201 Madison, LLC	201 W. Madison Street

One site was listed in the SRP Database, but could not be located with respect to the Site due to incomplete address information, this being Vacant Building located at 360-364 West Superior Street.

7. Surface Impoundment Inventory (IMPDMNT) – Statewide inventory of industrial, municipal, mining, oil & gas, and large agricultural impoundments. This study was conducted by the Illinois EPA to assess potential for contamination of shallow aquifers. This was a one-time study. Although many of the impoundments may no longer be present, the sites may be contaminated.

**PRIVILEGED & CONFIDENTIAL
SUBJECT TO ATTORNEY-CLIENT PRIVILEGE**

FINDING: According to the databases searched, the Site was listed in the IMPDMENT Database. No sites within a half-mile radius of the Site were listed in the IMPDMENT Database.

2.2 HISTORICAL RECORDS REVIEW

2.2.1 SANBORN FIRE INSURANCE MAPS

Sanborn Fire Insurance Maps assist in the identification of historic land use and commonly indicate the existence and location of aboveground and underground storage tanks, structures, improvements, and facility operations. Sanborn Maps for the years 1903, 1906, 1927, 1950, 1974, 1988, 1990, and 1994 were available from EDR and reviewed by CRA. The following is a summary of observations based on review of the Sanborn Maps:

1903: The 1903 Sanborn Map shows the Site to be vacant and undeveloped. Ohio Street is observed north of the Site with vacant land located beyond. A street referred to as "Boulevard" is observed east of the Site with vacant land located beyond. Indiana Avenue is observed south of the Site with a store located beyond. Vacant land is observed west of the Site with stores located beyond.

1906: The 1906 Sanborn Map shows the Site to be vacant and undeveloped. Ohio Street is observed north of the Site with vacant land located beyond. Fairbanks Court is observed east of the Site with a vacant lot located beyond. A vacant lot is observed west of the Site with warehouses and stores located beyond. Indiana Avenue is observed south of the Site. The property located south of the Site, south of Indiana Avenue is not indicated on the map.

1927: The 1927 Sanborn Map shows the northeastern portion of the Site to be vacant and undeveloped. The remainder of the Site consists of unidentified two-story structures without basements. The remaining adjacent properties are consistent with the 1906 Sanborn Map.

1950: The 1950 Sanborn Map shows the Site to be occupied by a filling station at the north end of the Site and similar two-story structures as shown in the 1927 aerial photo, but now designated as a warehouse and a garage located at the

**PRIVILEGED & CONFIDENTIAL
SUBJECT TO ATTORNEY-CLIENT PRIVILEGE**

south end of the Site and a garage in the northwestern portion of the Site. East Ohio Street is observed north of the Site with a filling station located beyond at the northwest corner of North Fairbanks Court and East Ohio Street. A storage building and a magazine distributor are located west of the Site. North Fairbanks Court is observed east of the Site with a filling station located beyond. East Grand Avenue is located south of the Site. The property located south of East Grand Avenue is not indicated on the map.

1974: The 1974 Sanborn Map shows the Site to be occupied by a filling station at the north end of the Site. The southern portion of the Site is vacant. The filling station located north of the Site at the northwest corner of North Fairbanks Court and East Ohio Street that was observed in the 1950 Sanborn Map is no longer present; however, a filling station is observed at the northwest corner of this property. North Fairbanks Court is observed east of the Site with the Chicago Time-Life Office Building located beyond. The western adjacent property is vacant with Underwriters Laboratories located beyond. East Grand Avenue is located south of the Site. The property located south of East Grand Avenue is not indicated on the map.

1988: The 1988 Sanborn Map shows the Site to be occupied by two buildings and a parking lot. A filling station is observed north of the Site, north of East Ohio Street in the central portion of the lot. The remaining adjacent properties remain consistent with the 1974 Sanborn Map.

1990: The 1990 Sanborn Map shows the Site to be consistent with the 1988 Sanborn Map. East Ohio Street is observed north of the Site with a parking lot located beyond. A Holiday Inn is observed northeast of the Site at the northeast corner of North Fairbanks Court and East Ohio Street. A parking lot is observed west of the Site. The remaining adjacent properties remain consistent with the 1988 Sanborn Map.

1994: The 1994 Sanborn Map shows the Site and adjacent properties to be in the same basic configuration as the 1990 Sanborn Map.

A copy of the Sanborn Maps is provided in Appendix C.

**PRIVILEGED & CONFIDENTIAL
SUBJECT TO ATTORNEY-CLIENT PRIVILEGE**

2.2.2 PROPERTY TITLE SEARCH

CRA contracted NCO Financial Systems, Inc. (NCO) to conduct a search of property title records and other documents (lease agreements, easements, etc.) dated from April 21, 1949 to August 30, 2002, associated with ownership or occupation of the Site. Based on the original Site address information provided to CRA, the title search was conducted for the 247 East Ohio Street address only. The following entities were reported to be associated with ownership or occupation of the above-mentioned Site address or portions of the Site during the specified time periods:

<i>Grantor</i>	<i>Grantee</i>	<i>Date</i>
D.S. Boyd, et al	Underwriters Laboratories, Inc.	April 21, 1949
Underwriters Laboratories, Inc. and American National Bank Trust Number 8239	Henry R. Levy, formerly Studebaker Sales Company	May 19, 1959
Henry R. Levy Company Mae Daum	Mae Daum Exchange National Bank and Trust, as Trustee under Trust Number 26143	January 31, 1972 November 3, 1976
Exchange National Bank and Trust, as Trustee under Trust Number 26143 Blanche Kirian	Blanche Kirian American National Bank and Trust Company of Chicago, as Trustee under the provisions of a certain Trust Agreement dated the 27 th day of October 1976 and known as Trust Number 39369	November 3, 1976 November 3, 1976

No leases, easements, or environmental liens were reported to be associated with the Site.

A copy of the title search summary is presented in Appendix D.

**PRIVILEGED & CONFIDENTIAL
SUBJECT TO ATTORNEY-CLIENT PRIVILEGE**

2.2.3 AERIAL PHOTOGRAPHS

Aerial photographs assist in the identification of Site features and outdoor activities of potential environmental concern. Aerial photographs for the years 1952, 1962, 1972, 1988, and 1999 were obtained from Historic Information Gathers (HIG) and were reviewed by CRA. All of the aerial photographs were reviewed at a scale of one inch equals approximately 500 feet. Copies of the aerial photographs for the Site are presented in Appendix E. The following is a summary of CRA's interpretation of features observed on the aerial photographs:

- 1952: The 1952 aerial photograph shows the Site to be developed with unidentified buildings. A vacant lot is located north of the Site, north of East Ohio Street. North Fairbanks Court is located east of the Site with what appears to be a filling station located beyond. Unidentified buildings are located west of the Site and south of the Site, south of East Grand Avenue.
- 1962: The 1962 aerial photograph shows the Site to be developed with a building and a parking lot encumbered with numerous vehicles. What appears to be a filling station is located north of the Site, north of East Ohio Street. The remaining adjacent properties are consistent with how they appeared in the 1952 aerial photograph.
- 1972: The 1972 aerial photograph shows the Site to be in the same basic configuration as the 1962 aerial photograph. What appears to be a parking garage is observed south of the Site. A building (currently the Chicago Time Life Office Building) is observed east of the Site, east of North Fairbanks Court. An unidentified building (possibly a filling station) and several vehicles are observed north of the Site, north of East Ohio Street. A parking lot and building containing several businesses are observed west of the Site.
- 1988: The 1988 aerial photograph shows the Site and adjacent properties to be consistent with the 1972 aerial photograph.
- 1999: The 1999 aerial photograph shows the Site to be developed with a parking lot and the current on-Site structures. A parking lot is observed south of the Site, south of East Grand Avenue. The Chicago Time Life Office Building is observed east of the Site, east of North Fairbanks Court. A parking lot and a building containing several businesses are located west of the Site. What

**PRIVILEGED & CONFIDENTIAL
SUBJECT TO ATTORNEY-CLIENT PRIVILEGE**

appears to be a vacant lot is located north of the Site, north of East Ohio Street.

A copy of the aerial photographs is provided as Appendix E.

2.2.4 CITY DIRECTORIES

City directories provide a listing of current and historic occupants of a building address. A city directory search was conducted by EDR from the earliest available directory to the present. Directories were available and were reviewed by EDR at approximately 5 year intervals starting in 1923 and ending in 1999.

The Site address (245 East Ohio Street) was listed in the 1931 city directory as Robertson Auto Repair Shop/Robertson Hans Garage. The Site address (251 East Ohio Street) was listed in the 1961 city directory as Suker Jacob R MD, in the 1976, 1981, and 1986 city directories as Lemmy's Devilishly Delicious Hot Dogs, and in the 1993 city directory as Hot Diggity Dog. The Site address (243 East Ohio Street) was listed in the 1961, 1966, 1971, 1976, 1981, 1986, and 1993 city directories as Fairbanks and Ohio Auto Park. No information for any of the other Site addresses or adjacent properties was reported in the city directory search.

A copy of the city directory search is provided in Appendix F.

2.3 PREVIOUS SITE INVESTIGATIONS/ESAs

CRA reviewed a *Focused Site Investigation Summary Report* prepared by Schrack Environmental Consulting, Inc. (Schrack) in April 1997 for Draper and Kramer, Incorporated. Schrack's report discussed an investigation regarding the potential presence of petroleum contamination resulting from a former filling station operated at the Site known as 243 East Grand Avenue. According to Schrack's report, Schrack completed fifteen soil borings and six groundwater monitoring wells at the Site in order to define the extent of contamination present and determine the level of remedial efforts necessary to obtain a No Further Action determination from the State. The soil boring and groundwater monitoring well locations are illustrated in Figure 3. The results of the

**PRIVILEGED & CONFIDENTIAL
SUBJECT TO ATTORNEY-CLIENT PRIVILEGE**

on-Site soil and groundwater sampling as summarized by Schrack verified benzene, toluene, ethylbenzene, and xylene (BTEX) concentrations below the applicable Tier 1 Soil and Groundwater Remediation Objectives (Tiered Approach to Corrective Action Objectives for Residential Properties – Inhalation and Ingestion Values) in all fifteen soil samples and in five of the six groundwater samples. A groundwater sample collected from a monitoring well installed at the northeast corner of the Site (MW2) contained a benzene concentration in excess of the above mentioned Remediation Objectives.

Based on the initial analytical results, Schrack completed three soil borings and groundwater monitoring wells in North Fairbanks Court to investigate subsurface conditions in the downgradient direction from the northeast corner monitoring well location. Due to the presence of numerous underground utilities in East Ohio Street, soil borings and monitoring wells could not be completed in the upgradient direction from the northeast corner monitoring well. According to Schrack's report, the results of the analyses completed on the additional soil and groundwater samples verified BTEX concentrations below the applicable Tier 1 Soil and Groundwater Remediation Objectives. Schrack's report also indicated that the shallow groundwater aquifer flows in a southeasterly direction. Moreover, Schrack's report also stated that the northeast corner monitoring well (MW2) is located hydraulically upgradient from the underground storage tank systems formerly located at the Site. Schrack concluded that the benzene discovered at the northeast corner of the Site may have been caused by releases from a former LUST site located directly upgradient of the Site (or from dispersion of dissolved phase petroleum contaminants into the shallow aquifer caused by releases from the former pump island and underground piping associated with the UST systems formerly operated at the Site). Schrack recommended that a Focused Site Investigation Summary Report and Remedial Action Plan be submitted to the Illinois Environmental Protection Agency (IEPA) for review and approval.

A comparison of the groundwater analytical results from Schrack's report to the current groundwater standards listed in Table E of Appendix B of 35 Illinois Administrative Code 742 – Tiered Approach to Corrective Action Objectives (TACO) indicates that five of the monitoring wells had exceedences of the Class I or Class II groundwater standards. The benzene concentration in several monitoring wells (MW-1, MW-2, MW-3, MW-6, and MW-7) exceeded the Class I groundwater standard. Excluding the results from MW-1, the benzene concentration from the remaining four monitoring wells also exceeded the Class II groundwater standard. The groundwater results from MW-2 also

**PRIVILEGED & CONFIDENTIAL
SUBJECT TO ATTORNEY-CLIENT PRIVILEGE**

exceeded the Class I and II groundwater standards for toluene, ethylbenzene, and xylenes. It should be noted that the City of Chicago has a Memorandum of Understanding (MOU) with the Illinois Environmental Protection Agency (IEPA) prohibiting groundwater use within the City, thereby eliminating the groundwater exposure pathway so long as the limits of the contamination are delineated appropriately.

CRA also compared Schrack's soil analytical results to the current TACO Tier I soil remediation objectives. This comparison confirmed Schrack's conclusion that the soil analytical results were below the TACO Tier I soil ingestion and inhalation remediation objectives. However, the concentration of ethylbenzene in the soil sample collected from soil boring DKSB4 exceeded the soil component of the groundwater ingestion exposure route for Class I groundwater. Notably, the MOU between the City of Chicago and IEPA would likely eliminate this exposure pathway.

CRA reviewed a Report of Survey Activities performed at 247 East Ohio Street prepared by RSSI. According to RSSI's report, radioactive material was historically used in industrial operations that were located between Illinois Street and Grand Avenue east of Michigan Avenue. Use of this material led to known soil contamination in areas near the Site. Due to concerns of possible contamination at the Site (247 East Ohio Street), a survey was performed to determine whether the Site was contaminated with residual radioactive material. Investigative activities undertaken consisted of the following:

- completion of a surficial survey of the Property;
- installation of four soil borings at locations where elevated radiation levels were measured during the walkover survey;
- downhole measurement of radiation levels within the completed soil borings; and
- analysis of one soil sample using high-resolution gamma spectroscopy to identify and measure radiation levels.

The results of the surface survey demonstrated evidence of radioactivity above normal background levels at a number of locations. The down hole measurements were elevated above levels usually attributable to naturally occurring radioactive materials (NORM). The gamma spectroscopy results showed concentrations of radium-226 and

**PRIVILEGED & CONFIDENTIAL
SUBJECT TO ATTORNEY-CLIENT PRIVILEGE**

radium-228 surrogates in excess of the U.S. EPA's local action level of 7.1 pCi/g (total radium).

CRA completed a limited Property Investigation in April 2001 at the Site (247 East Ohio Street). The purpose of the limited Property investigation was to evaluate the Site from the perspective of assessing subsurface radiation relative to naturally occurring background radiation levels in local unimpaired soils and to evaluate the potential volume of soil containing elevated radiation levels. The primary objective of the limited Property investigation was to delineate radioactive thorium that exists above the cleanup level established by the US EPA for the neighboring sites. Investigative activities completed by CRA consisted of the following:

- installation and sampling of 59 soil borings (see Figure 4) at locations where elevated radiation levels were observed during the walkover survey and at subsurface areas anticipated to be disturbed by Draper and Kramer's development of the Site;
- downhole measurement of radiation levels within the completed soil borings;
- analysis of 94 soil samples using high-resolution gamma spectroscopy to identify and measure radiation levels; and
- surveying of the completed soil boring locations.

Results from CRA's limited Property investigation completed at the Site confirmed the presence of radioactive materials in the soil in at least two areas along the western portion of the Site at levels above the cleanup level established by the U.S. EPA.

**PRIVILEGED & CONFIDENTIAL
SUBJECT TO ATTORNEY-CLIENT PRIVILEGE**

3.0 SITE INSPECTION

On October 11, 2002, Kelly Connolly of CRA completed an inspection of the Site located at the southwest corner of East Ohio Street and North Fairbanks Court. On October 28, 2002, CRA completed an inspection of the three on-Site structures. Ms. Erme Bet of Inter Parking provided access to the on-Site structures during the October 28th Site inspection. The Site inspections included an inspection of the Site and Site structures, review of relevant Site records available to CRA, visual observations of adjacent properties as viewed from the Site and surrounding roadways, and interviews with individuals associated with the Site. A Site representative, Mr. Alfred E. Dancona III, was contacted by phone for information regarding Site operations and historic Site use.

3.1 SITE OVERVIEW

The Site consists primarily of an approximately 32,700-square foot asphalt-paved active pay parking lot located at the southwest corner of East Ohio Street and North Fairbanks Court in Chicago, Illinois. Improvements to the Site include three buildings including a fast food restaurant (Hot Diggity Dog), a vacant metal building, and an attendant's booth for the parking lot attendants. The fast food restaurant and vacant building are prefab metal buildings constructed in approximately 1993. A small stockpile of apparent construction debris (concrete rubble) was observed at the west end of the Site during the Site inspection. Based on documentation reviewed by CRA, several addresses have been used for the Site including the following: 253 East Ohio Street, 251 East Ohio Street (currently Hot Diggity Dog), 247 East Ohio Street (currently vacant metal building), 245 East Ohio Street, 243 East Ohio Street, and 242 to 256 East Grand Avenue.

Based on documentation reviewed by CRA, a filling station historically occupied the northern portion of the Site circa 1950 until 1975. Based on a review of Sanborn Maps, a warehouse and garage occupied the southern portion of the Site circa 1950 until sometime between 1950 and 1974. According to Site personnel, a horse barn was present at the Site sometime in the 1940s.

Based on a review of city directories, Robertson Auto Repair/Robertson Hans Garage historically occupied the 245 East Ohio Street address. Suker Jacob R MD and Lemmy's Devilishly Hot Dogs historically occupied the building currently occupied by Hot

**PRIVILEGED & CONFIDENTIAL
SUBJECT TO ATTORNEY-CLIENT PRIVILEGE**

Diggity Dog (251 East Ohio Street). Fairbanks and Ohio Auto Park have occupied the Site (243 East Ohio Street) circa 1961 until the present. No information was available on the other associated addresses.

A copy of representative Site photographs is presented as Appendix G.

3.2 ENVIRONMENTAL SETTING/ADJACENT PROPERTIES

The Site is rectangular in shape and is located in a commercial area of Chicago, Cook County, Illinois. East Ohio Street and North Fairbanks Court provide access and egress to the Site. The Property is situated on relatively flat terrain. No stressed vegetation, stained soils, or surficial evidence of fill other than the stockpile of apparent construction debris located at the west end of the Site were observed on the Property during the Site inspection.

The Site is bordered:

- to the north by East Ohio Street with a vacant lot and lofts/offices located beyond;
- to the west by businesses including Emilios Tapas Restaurant, Grand Ohio Condo, and Fast Signs with lofts located above the businesses;
- to the south by East Grand Avenue with a parking garage located beyond;
- to the east by Fairbanks Court and beyond by the Chicago Time Life Office Building; and
- to the northeast by Holiday Inn and McClurg Court Center.

No evidence of adverse impact to the Site from the adjacent properties was observed by CRA during the Site inspection. The following adjacent properties were listed in the environmental databases searched:

- The Lindsay Light II Site is located on the southern adjacent property and was on the CERCLIS list. The Lindsay Light II site is a public parking lot located at 316 East Illinois Street. The three-acre lot is bordered by Grand Avenue, Illinois Street, McClug Court, and Columbus Drive. Records show that the Lindsay Light II Site

**PRIVILEGED & CONFIDENTIAL
SUBJECT TO ATTORNEY-CLIENT PRIVILEGE**

originally housed a stable, which was later used as a laboratory/processing facility by the former Lindsay Light Chemical Company (see Section 3.14).

- Holiday Inn is located northeast of the Site at 300 East Ohio Street and was listed in the RCRIS-SQG Report.
- The Chicago Time Life Building is located on the eastern adjacent property, east of North Fairbanks Court and was listed in the RCRIS-SQG Report.
- A vacant parking lot located at 255 East Ohio Street was listed in the Illinois UST Report as having three removed USTs. The exact location of this parking lot is unknown by CRA.
- An Amoco Service Station was historically located on the northern adjacent property at 252 East Ohio Street and was listed in the Illinois UST Report as having three removed USTs. The Amoco Station was also listed in the Illinois LUST Report as having a closed status. This Amoco Service Station is no longer present at the 252 East Ohio Street address.

No other adjacent properties were listed in any of the databases searched.

During CRA's limited Property Investigation conducted in April 2001, two main stratigraphic units were encountered within the upper 13 feet of soil beneath the Site. The first unit consisted of fill material that was encountered in all of the soil borings. The fill material consisted mainly of silt, sand, and clay with varying amounts of gravel. In addition, the fill material also contained varying amounts of rubble consisting of brick fragments, concrete and minor amounts of slag, coal, glass, and wood. The fill material was underlain by native sand. The sand consisted mainly of fine-grained dense sand that was tan or gray in color. Based on documentation reviewed by CRA, groundwater flow direction beneath the Site is in a southeasterly direction. The Site is not located within a flood hazard area. No surface water is located on the Property. The closest body of water to the Site is the Chicago River located approximately 1,000 feet south of the Site. Lake Michigan is located approximately 2,000 feet east of the Site.

3.3 UTILITY SERVICES

Commonwealth Edison (ComEd) provides electricity to the Site through overhead service connections. The fast food restaurant (Hot Diggity Dog) is heated by natural gas

**PRIVILEGED & CONFIDENTIAL
SUBJECT TO ATTORNEY-CLIENT PRIVILEGE**

while cooling is provided by a roof-mounted central air-conditioning unit. CRA was unable to determine how the vacant metal building and the attendant's booth are heated. Stormwater from the Site is collected through storm drains located along the roadways and discharges to the municipal storm sewer.

The City of Chicago provides potable water and sanitary sewer services to the Site. Site personnel were not aware of any on-Site septic systems or potable water wells either in use currently or historically at the Site. No evidence of on-Site potable water wells or septic systems was observed by CRA at the time of the Site inspection. Groundwater monitoring wells were observed on the Property.

3.4 UNDERGROUND STORAGE TANKS (USTs)

According to Site personnel, there currently are no USTs in service or located at the Site. No evidence of on-Site USTs (e.g. vent or fill pipes, etc.) was observed by CRA during the Site inspection.

The Site address (247 East Ohio Street) was listed in the Illinois LUST Report as Dancona & Company and was reported as having an open status.

Based on documentation reviewed by CRA, a filling station historically occupied the northern portion of the Site circa 1950 until 1975. Reportedly, one 1,000-gallon and two 550-gallon USTs were removed from the Site in February 1994 by RTE Environmental Solutions, Inc. Upon removal of the USTs, petroleum-degraded soils were observed by a representative of the Office of the State Fire Marshall (OSFM) overseeing the UST removals. In accordance with State and Federal regulations, a release was reported to the Illinois Emergency Management Agency (IEMA) and incident number 94-0293 was issued for the Site. Subsequent soil and groundwater investigations were conducted based on the reported release and were previously summarized in Section 2.3.

3.5 ABOVEGROUND STORAGE TANKS (ASTs)

Based on information provided by Site personnel and from CRA field observations, no ASTs presently exist on Site. No ASTs historically have been owned or operated at the

**PRIVILEGED & CONFIDENTIAL
SUBJECT TO ATTORNEY-CLIENT PRIVILEGE**

Site, according to Site personnel. No evidence of former AST use or releases therefrom was observed by CRA during the Site inspection.

3.6 RAW MATERIAL AND CHEMICAL USE AND STORAGE

Based on CRA observations, chemicals currently used and stored on Site are limited to small quantities of routine household cleaning chemicals and restaurant-related chemicals associated with the fast food restaurant.

No evidence of a release of chemical or petroleum products from the Site was observed by CRA during the Site inspection. Site personnel had no knowledge of chemical or petroleum spills or releases having occurred at the Site, with the exception of leaking USTs from a filling station historically located at the Site (see Section 3.4).

3.7 SOLID AND SPECIAL WASTE

Solid wastes generated at the Site include general office refuse and restaurant-related wastes. Solid wastes are placed in a dumpster prior to removal for disposal by Flood Brothers Disposal/Recycling Services. Two 55-gallon drums containing grease were observed south of Hot Diggity Dog at the time of the Site inspection.

Significant amounts of fill material are known to have been added historically to raise the grade of city streets above the original natural marshy ground. It is probable that the Site is underlain by fill material dating from the 19th century. Also, the Site is located in an area that was destroyed during the Great Chicago Fire of 1871. Based on other similar areas, polynuclear aromatic hydrocarbon (PNA) contamination is often associated with these areas. The nature and quality of fill material at the Site are unknown at present. However, varying amounts of rubble consisting of brick fragments, concrete and minor amounts of slag, coal, glass, and wood were identified in soil borings advanced at the Site during the limited Property Investigation conducted by CRA in April 2001. Moreover, and as discussed previously, the fill contains radioactive materials with total activity levels in excess of U.S. EPA's clean up standard established for the Lindsey Light Site of 7.1 pCi/g (total radium).

**PRIVILEGED & CONFIDENTIAL
SUBJECT TO ATTORNEY-CLIENT PRIVILEGE**

No evidence of on-Site solid or chemical waste disposal was observed by CRA during the Site inspection or in the aerial photographs. A small pile of surficial debris consisting of concrete rubble was observed along the western Property line during the Site inspection. However, the presence of radioactive Thorium-containing waste residue was observed during the April 2001 Property Investigation.

3.8 HAZARDOUS WASTE

According to Site personnel and based on Site observations, no hazardous wastes are currently generated, treated, stored, or disposed on Site. The Site was not listed in the RCRIS-SQG, RCRIS-LQG, or RCRIS-TSD Databases.

3.9 WASTEWATER/SEWERS

No process wastewaters are generated at the Site. Wastewater generated at the Site consists of domestic wastewater from the buildings located on the Property. Wastewaters are discharged to the municipal sanitary sewer system.

3.10 STORMWATER

Stormwater runoff from the Property includes rainwater from the building roofs, parking lot, and the surrounding grounds. Stormwater from the Property is directed towards storm drains located in the adjacent roadways. No outdoor industrial activity or storage of hazardous materials occurs at the Site.

3.11 AIR EMISSIONS

No regulated air emissions sources were observed at the Site by CRA during the Site inspection.

**PRIVILEGED & CONFIDENTIAL
SUBJECT TO ATTORNEY-CLIENT PRIVILEGE**

3.12 ASBESTOS CONTAINING MATERIALS (ACM)

An asbestos survey was not conducted as part of this ESA. Potential ACM observed by CRA during the Site inspection included ceiling tiles and 12-inch by 12-inch floor tiles in the fast food restaurant and 12-inch by 12-inch floor tiles in the vacant building. These materials were observed to be in good condition at the time of the Site inspection. Additional potential ACM may be present in areas not accessible to CRA during the Site inspection.

3.13 POLYCHLORINATED BIPHENYLS (PCBs)

ComEd provides electricity to the Site through overhead service connections. No potential PCB-containing equipment was observed at the Site by CRA during the Site inspection.

3.14 IONIZING RADIATION

No labeled radiation sources were observed by CRA during the Site inspection. The USEPA has determined Cook County to be in a level 2 Radon Zone, with indoor air concentrations of radon estimated to be between 2 and 4 pCi/L. The USEPA recommended action level for radon gas is 4 pCi/L.

The Site is located in close proximity to the Lindsay Light Superfund Site and the Lindsay Light II site where soils containing radioactive thorium have been previously reported. The Lindsay Light Chemical Company is the former maker of incandescent gas mantles for home and street lighting. Based on documentation reviewed by CRA, the Lindsay Light Chemical Company manufactured mantles circa 1910 until 1933 at 161 East Grand Avenue. The process of gas mantle manufacturing involves dipping gauze mantle bags into solutions containing thorium nitrate and small amounts of cerium, beryllium and magnesium nitrates. The principal ingredient in thorium nitrate is radioactive thorium, specifically thorium-232. On June 3, 1993, the US EPA and the Illinois Department of Nuclear Safety (IDNS) conducted a joint investigation at the Lindsay Light II Site. This investigation verified the presence of radioactivity at levels above natural background levels. Gamma readings were found as high as 280 uR/hr.

**PRIVILEGED & CONFIDENTIAL
SUBJECT TO ATTORNEY-CLIENT PRIVILEGE**

Background measured at the Lindsay Light II site exhibited gamma readings at 20 uR/hr.

On September 28 and 29, 2000, the US EPA conducted a radiation walkover survey of the Site (245 East Ohio Street) to determine whether there were any elevated radiation readings at the surface that might indicate the presence of subsurface radioactive materials. According to a letter issued by the US EPA, dated December 2000, elevated readings were found in three areas located on the Property. Distinctly elevated readings were detected at an area along the west side of the Site. The other two areas were reported to be small and were located near the south-center of the lot and at the southeast corner of the lot. According to the US EPA's letter, the survey indicated that radioactive material is present under the asphalt in one area (west side of the Property) and possibly in the other two areas. The US EPA considered the levels around the fast food restaurant and in the attendant's booth to be normal background levels. The US EPA concluded that none of these areas pose an immediate health hazard; however, the risk for contamination of people and equipment would rise appreciably if the asphalt were removed.

The presence of soils containing elevated levels of radioactive thorium on the Property was confirmed during an investigation completed in February 2001. Subsequently, CRA conducted a Property Investigation at the Site in April 2001 to evaluate the Property from the perspective of assessing subsurface radiation relative to naturally occurring background radiation levels in local unimpaired soils and to evaluate the potential volume of soil containing elevated radiation levels. The results of the April 2001 investigation reconfirmed the presence of radioactive materials in the soil in at least two areas along the western portion of the Site at levels above the cleanup level established by the United States Environmental Protection Agency (USEPA) for the Lindsay Light site.

3.15 SPILLS/RELEASES

Based on documentation reviewed by CRA, there have been no reportable spills or releases of hazardous substances on the Property, with the exception of leaking USTs from a filling station historically located at the north end of the Site (see Section 3.4).

**PRIVILEGED & CONFIDENTIAL
SUBJECT TO ATTORNEY-CLIENT PRIVILEGE**

3.16 CERCLA LIABILITY POTENTIAL

The Site is not listed on the NPL or in the State Hazardous Waste Site Database. No other information was available regarding the CERCLA Liability Potential of the Site.

PRIVILEGED & CONFIDENTIAL
SUBJECT TO ATTORNEY-CLIENT PRIVILEGE

4.0 SUMMARY OF IDENTIFIED ENVIRONMENTAL ISSUES

4.1 FINDINGS

Based on the Phase I ESA including the Site inspection, database search, historic records reviewed, information provided by Site personnel, and interviews, the following potential Recognized Environmental Conditions, as defined in ASTM Standard E1527-00, were identified at the Site:

4.1.1 POTENTIAL CURRENT RECOGNIZED ENVIRONMENTAL CONDITIONS

- i) **On-Site Soil Contamination (Thorium):** The Site is located near the Lindsay Light Superfund Site and the Lindsay Light II Site where soils containing radioactive thorium have been previously reported. The presence of soils containing elevated levels of radioactive thorium on the Property was confirmed during an investigation completed by CRA in February 2001. Subsequently, CRA conducted a Property Investigation at the Site in April 2001 to evaluate the Property from the perspective of assessing subsurface radiation relative to naturally occurring background radiation levels in local unimpaired soils and to evaluate the potential volume of soil containing elevated radiation levels. The results of the April 2001 investigation confirmed the presence of radioactive materials in the soil in at least two areas along the western portion of the Site at levels above the cleanup level established by the United States Environmental Protection Agency (USEPA) for the Lindsay Light Site (7.1 pCi/g total radium).
- ii) **Solid Waste:** Significant amounts of fill material are known to have been added historically to raise the grade of city streets above the original natural marshy ground. It is probable that the Site is underlain by general fill material dating from the 19th century. Also, the Site is located in an area that was destroyed during the Great Chicago Fire of 1871, which typically resulted in the presence of polynuclear aromatic hydrocarbons (PNAs) being present. The nature and quality of fill material at the Site are unknown at present. However, varying amounts of rubble consisting of brick fragments, concrete and minor amounts of slag, coal, glass, and wood were identified in soil borings advanced at the Site during a limited Property Investigation conducted by CRA in April 2001.

**PRIVILEGED & CONFIDENTIAL
SUBJECT TO ATTORNEY-CLIENT PRIVILEGE**

4.1.2 POTENTIAL HISTORICAL RECOGNIZED ENVIRONMENTAL CONDITIONS

- i) **Former On-Site Filling Station:** A filling station was historically located at the Site. Based on documentation reviewed by CRA, one 1,000-gallon and two 550-gallon USTs were removed from the Site in February 1994. Upon removal of the USTs, petroleum-degraded soils were observed by an inspector from the Office of the State Fire Marshall (OSFM). In accordance with State and Federal regulations, a release was reported to the Illinois Emergency Management Agency (IEMA) and incident number 94-0293 was issued for the Site. The Site was listed in the LUST Report as Dancona & Company located at 247 East Ohio Street and was reported as having an open status.
- v) **Northern Adjacent Property USTs:** Three separate filling stations historically occupied the property across E. Ohio Street to the north of the Site at the northwest corner of East Ohio Street and North Fairbanks Court circa 1950 until sometime between 1988 and 1990. Amoco Oil Company #5911 historically located at 252 East Ohio Street was listed in the Illinois UST Report as having three removed USTs and was listed in the Illinois LUST Report as having been issued a No Further Action (NFA) letter. While residuals may be present at the former Amoco Oil Company site, the NFA letter would indicate that levels remaining and available exposure pathways would not impact adjacent properties to an extent creating a concern to the State.
- vi) **Eastern Adjacent Property USTs:** A filling station historically occupied the property across N. Fairbanks Court to the east of the Site at the southeast corner of East Ohio Street and North Fairbanks Court circa 1950 until sometime between 1950 and 1974. No investigation or testing data is available with which to evaluate whether potential releases from the filling station UST(s) have adversely impacted soils or groundwater at the Site.
- vii) **Potential Adjacent Property USTs:** A vacant parking lot historically located at 255 East Ohio Street was listed in the UST Report as having three removed USTs. Although the vacant parking lot was not listed in the Illinois LUST Report as having any releases, no investigation or testing data is available with which to evaluate whether potential releases from the USTs have adversely impacted soils or groundwater at the Site. Moreover, CRA is unable to determine the exact location of this vacant parking lot.

**PRIVILEGED & CONFIDENTIAL
SUBJECT TO ATTORNEY-CLIENT PRIVILEGE**

4.2 CONCLUSIONS

CRA has completed a Phase I Environmental Site Assessment of an active pay parking lot located at the southwest corner of East Ohio Street and North Fairbanks Court located in Chicago, Illinois in conformance with the scope and limitations of ASTM Practice E1527-00. Any exceptions to or deletions from this practice are described in Section 1.0 of this report. This assessment did not identify any Recognized Environmental Conditions at this Site, with the exception of the following:

- **On-Site Soil Contamination (Thorium)**
- **Solid Waste (historic city grading activities/Great Chicago Fire)**
- **Former On-Site Filling Station**
- **Eastern Adjacent Property USTs**
- **Potential Adjacent Property USTs**
- **Northern Adjacent Property USTs**

All of Which is Respectfully Submitted,

EDUCATION

B.Sc. State University of New York at Albany
Other
Courses 40 Hour OSHA Hazardous Waste Certification
AHERA Certified Asbestos Building Inspector

EMPLOYMENT

1995- Present Project Scientist/Asbestos Inspector
Conestoga-Rovers & Associates
1991-1995 Project Manager/Environmental Consultant/Asbestos Inspector
U.S. Environmental Group, Inc.
1990-91 Office Manager/Project Manager/Asbestos Inspector
Environmental Petroleum & Remediation Services, Inc.

PROFILE OF PROFESSIONAL ACTIVITIES

Environmental Assessments

- Performed environmental site assessments for acquisition, secured financing, or compliance at the following commercial/industrial facilities:
 - In excess of 600 funeral homes across the United States;
 - In excess of 100 auto parts facilities across the United States;
 - In excess of 50 drycleaning facilities throughout South Florida;
 - In excess of 20 golf driving ranges across the United States;
 - In excess of 20 pharmaceutical companies across the United States;
 - In excess of 5 strip shopping centers across the United States;
 - In excess of 5 production facilities throughout Illinois and Iowa;
 - Trucking facility - Riviera Beach, Florida;
 - Trucking facility - Pompano Beach, Florida;
 - Boat Marina - West Palm Beach, Florida; and
 - Recycling facility - Delray Beach, Florida.
- Provided technical environmental assistance to industrial/commercial clients including:
 - Phase II Sampling investigation relating to leaking underground storage tanks at a strip-shopping center - West Palm Beach, Florida;
 - Phase II Sampling investigation relating to soil contamination by heavy metals impact - Riviera Beach, Florida;
 - Phase II Sampling investigation relating to soil impairment by historical petroleum hydrocarbon and chlorinated solvent releases - Kenosha, Wisconsin; and

- Phase II Sampling investigation relating to leaking underground storage tanks and soil contamination at a former gasoline station converted into a drycleaning plant - Davenport, South Carolina.

*Remedial Investigation/Facility Compliance Inspection/
RCRA Facility Investigation*

- Served as Project Manager for all aspects from work plan development to final report preparation for investigation of the following facilities:
 - Kennedy Space Center (KSC) railroad facility - Florida;
 - Kennedy Space Center heavy equipment shop - Florida;
 - Kennedy Space Center calibration lab - Florida; and
 - Fabrication Plant - Cocoa, Florida; and
 - Manufacturing facility - Michigan
- Field experience includes proficiency in the operation of a wide-range of field monitoring equipment; collection of soil, groundwater and industrial waste samples; surveying, performance of aquifer pump tests; supervision of well installations and soil boring advancement; and interpretation of laboratory analytical data. Additional responsibilities include the coordination of hazardous waste disposal, asbestos-containing material inspections complete with development of related mitigation estimates of cost and ancillary reporting and assistance with environmental due diligence strategy planning.

EDUCATION

B.S. St. John's University, Collegeville, Minnesota, 1977, Cum Laude
M.B.A. College of St. Thomas, St. Paul, Minnesota, 1986

EMPLOYMENT

1995 - Present Principal, Minnesota Branch Manager
Conestoga-Rovers & Associates
1993-95 Associate, Minnesota Branch Manager
Conestoga-Rovers & Associates
1988-92 Project Manager, Minnesota Branch Manager, Conestoga-Rovers & Associates
1985-88 Remedial Project Manager, Honeywell Defense Systems Group
1983-85 Senior Environmental Engineer, Honeywell Defense Systems Division
1981-83 Environmental Engineer, Honeywell Defense Systems Division
1979-81 Project Manager, U.S. Army Toxic and Hazardous Materials Agency
1978-79 Chemical Staff Officer, Department of the Army, Project Manager for Chemical
Demilitarization and Installation Restoration
1977-78 Ordnance Officer, Munitions Materiel Management, U.S. Army

PROFILE OF PROFESSIONAL ACTIVITIES

Remedial Investigations/Site Investigations/RCRA Facility Investigations and Feasibility Studies

- Served as Project Manager for all aspects from work plan development through final report preparation for investigation of the following facilities:
 - Electronic component manufacturing plant - New Brighton, Minnesota (NPL Site)
 - Metal parts manufacturing plant - New Brighton, Minnesota (NPL Site)
 - Engineering and testing facility - Anoka County, Minnesota
 - Precision metals fabricating plant - Niles, Michigan
 - Tennessee chemical company plant - Copperhill, Tennessee
 - Demolition landfill - New Brighton, Minnesota
 - Private dump - New Brighton, Minnesota
 - Trio solvents plant - New Brighton, Minnesota
 - Sporting goods manufacturing facility - Tennessee
 - Vehicle maintenance facility - Minnesota
 - Metal parts manufacturing facilities - Germany, Czech Republic, England
 - Electro-mechanical components facility - New York
 - Industrial landfills - Michigan, Texas

- Served as Project Manager for all aspects of remedial investigations at propellant and explosives manufacturing and loading plants. The specific areas of investigation included explosive and propellant manufacture, explosive loading, red and pink water disposal, detonation sites and explosives burning at the following plants:
 - Joliet Army Ammunition Plant - Elwood, Illinois (NPL Site)
 - Iowa Army Ammunition Plant - Burlington, Iowa
 - Badger Army Ammunition Plant - Baraboo, Wisconsin
 - Louisiana Army Ammunition Plant - Doyline, Louisiana (NPL Site)
 - Cornhusker Army Ammunition Plant - Grand Island, Nebraska (NPL Site)
 - Twin Cities Army Ammunition Plant - New Brighton, Minnesota (NPL Site)

Environmental Assessments/Audits

- Performed environmental assessments for acquisition, secured financing or compliance at the following facilities:
 - Six electronic component manufacturing facilities - Minnesota, Pennsylvania
 - Two explosive loading plants - Illinois, Iowa
 - Four solid fiberboard and paper mills - California, Vermont, Michigan, Minnesota
 - Metals fabrication and die casting plants - Illinois, North Carolina
 - Metals fabrication facilities - Ohio, South Carolina, Illinois, Brazil, Germany, England, Czech Republic, Missouri, Nevada, New York, Indiana
 - Chemical formulation plants - Illinois, England, Ireland
 - Sixteen manufacturing and warehouse facilities - Illinois, Indiana, Wisconsin, Georgia, Texas, Pennsylvania, California
 - Food production, processing, and packaging plants - Indiana, Louisiana, Minnesota, Ohio, New York, California, Illinois
 - Twelve construction equipment maintenance facilities - Georgia, Minnesota, Washington
 - Two industrial equipment manufacturing facilities - Ohio
 - Seven soft drink bottling plants - Arkansas, North Carolina, South Carolina, Tennessee, Belgium
 - Thirteen soft drink distribution facilities - Arkansas, North Carolina, South Carolina, Tennessee, Texas, Belgium
 - Five heavy equipment manufacturing plants - Illinois, Wisconsin, Indiana
 - Nine commercial munitions, production and testing facilities - Ohio, Pennsylvania, Florida, New Mexico, Tennessee
 - Three medical equipment manufacturing facilities - Connecticut, Puerto Rico
 - Two cement plants - Iowa, Mississippi
 - Two precision metals fabrication plants - Michigan, Illinois
 - Chemical manufacturing plants - Tennessee, Wisconsin
 - Eleven athletic and swimming facilities - Minnesota
 - Five waste derived fuel plants - Missouri, Kansas, Indiana, Pennsylvania, Maryland
 - Cabinet manufacturing plants - Texas, Kentucky
 - Photo processing facilities - Minnesota, Missouri, Netherlands, Kansas

- Photographic film manufacturing facilities - United Kingdom, Germany, Switzerland
- Six corrugated box plants - South Carolina, Georgia, Alabama, Tennessee
- Seven fiberboard partition plants - Maine, New Jersey, Wisconsin, Quebec, Iowa, Minnesota, Massachusetts
- Two hazardous waste blending facilities - Ohio
- Plastic extrusion and molding plants - Germany, Michigan, Minnesota
- Window and door manufacturing facilities - Wisconsin, Michigan, Iowa
- Ten furniture manufacturing facilities - North Carolina
- Foundries - Michigan, Illinois, Ohio, Pennsylvania, Tennessee
- Photographic chemical and plate manufacturing - Germany, Switzerland, England
- Chemical processing facilities - United States, Australia, Korea, Japan

Remedial Designs or Remedial Construction Supervision

- Served as Project Manager for the design and/or construction of the following remedial actions:
 - Groundwater collection tile, extraction and VOC treatment system - (NPL Site) New Brighton, Minnesota
 - Extraction well and VOC treatment system - (NPL Site) New Brighton, Minnesota
 - 2900 GPM groundwater extraction, VOC treatment and recharge system - (NPL Site) New Brighton, Minnesota
 - Excavation and on-site contained storage of 12,000 tons of PCB contaminated soil - (NPL Site) New Brighton, Minnesota
 - Groundwater Extraction and Discharge System - New Brighton, Minnesota
 - Excavation and off-site disposal of metals contaminated soils - New Brighton, Minnesota
 - Decontamination and off-site disposal of PCB equipment and oils - New Brighton, Minnesota
 - Decontamination of PCB contaminated plant areas - Lafayette, Indiana
 - Excavation and off-site disposal of over 100,000 tons of organics contaminated soil (NPL Site) - New Jersey
 - Industrial sewer cleaning and sludge handling project involving VOCs, PCBs and metals - (NPL Site) New Brighton, Minnesota
 - Excavation and off-site disposal of lead contaminated soils - Minneapolis, Minnesota
 - PCB soil contamination site - Iowa
 - Soil vapor extraction system for VOC removal - Wisconsin
 - Air sparging system for VOC removal - Minnesota
 - VOC air stripping water treatment system - New Jersey
 - Excavation, on-site separation and off-site disposal of contaminated soils - Fridley, Minnesota
 - Soil vapor extraction system for VOC removal - Germany

Environmental Compliance at Industrial Facilities

- Responsible for environmental compliance at multi-facility division of Honeywell, Inc. including:
 - Prepared permit applications for hazardous waste treatment and storage facilities
 - Developed in-plant hazardous waste management procedures for division

- Developed RCRA training programs for treatment and storage facilities
- Managed in-house hazardous waste generation, treatment, storage and disposal program for six manufacturing facilities
- Developed in-plant spill response procedures for manufacturing facilities
- Prepared industrial discharge (POTW) permit applications for manufacturing plants and remedial actions
- Prepared NPDES permits for remedial actions

Technical Support for Litigation and Administrative Orders

- Provided the following technical expert services in conjunction with permitting and litigation issues:
 - Assisted PRP at VOC contaminated groundwater site consisting of review and comment on; remedial investigations, feasibility studies, risk assessment, groundwater modeling, records of decision, consent orders - NPL site in Minnesota
 - Assisted PRP at VOC and PCB contaminated site consisting of review and comment on; remedial investigations, feasibility studies, risk assessment and administrative orders - Illinois
 - Assisted PRP group at mixed municipal and demolition landfill consisting of review and comment on; remedial investigation, remedial objectives and remedial cost estimates - NPL site in Minnesota
 - Assisted industrial client in negotiation of administrative and judicial orders for investigation and implementation of corrective actions at a mining and chemical manufacturing facility - Tennessee
 - Assisted township in removing a potential landfill site from final consideration list - Minnesota
 - Assisted PRP group at mixed municipal landfill consisting of RD/RA Scope of Work negotiations, remedial cost estimates, allocation negotiations and mediation - NPL site in Minnesota
 - Assisted industrial clients in negotiation of contribution claims for past releases on property - Iowa, Texas, Tennessee, Minnesota, Wisconsin, Idaho, Pennsylvania, Illinois, Indiana
 - Assisted industrial client with evaluation of compliance and recommended corrective measures in response to potential litigation - Mississippi
 - Assisted industrial client with PCB risk issues from former industrial disposal site under litigation - Michigan

USGS TOPOGRAPHIC MAP ASSOCIATED WITH TARGET PROPERTY

Target Property: _____
Source: USGS 7.5 min quad index

TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the ASTM E 1527-00 search radius around the target property for the following databases:

FEDERAL ASTM STANDARD

NPL..... National Priority List
Proposed NPL..... Proposed National Priority List Sites
RCRIS-TSD..... Resource Conservation and Recovery Information System
ERNS..... Emergency Response Notification System

STATE ASTM STANDARD

SHWS..... State Oversight List
SWF/LF..... Available Disposal for Solid Waste in Illinois - Solid Waste Landfills Subject
to State Surcharge
IMPDMNT..... Surface Impoundment Inventory

FEDERAL ASTM SUPPLEMENTAL

CONSENT..... Superfund (CERCLA) Consent Decrees
ROD..... Records Of Decision
Delisted NPL..... National Priority List Deletions

FTTS	FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)

EDR PROPRIETARY HISTORICAL DATABASES

Coal Gas..... Former Manufactured Gas (Coal Gas) Sites

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified.

Elevations have been determined from the USGS 1 degree Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. EDR's definition of a site with an elevation equal to the target property includes a tolerance of +/- 10 feet. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property (by more than 10 feet). Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in *bold italics* are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

FEDERAL ASTM STANDARD

CERCLIS: The Comprehensive Environmental Response, Compensation and Liability Information System contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA).

CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the CERCLIS list, as provided by EDR, and dated 05/15/2002 has revealed that there is 1 CERCLIS site within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

CERCLIS-NFRAP: As of February 1995, CERCLIS sites designated "No Further Remedial Action Planned" (NFRAP) have been removed from CERCLIS. NFRAP sites may be sites where, following an initial investigation, no contamination was found, contamination was removed quickly without the need for the site to be placed on the NPL, or the contamination was not serious enough to require Federal Superfund Action or NPL consideration. EPA has removed approximately 25,000 NFRAP sites to lift the unintended barriers to the redevelopment of these properties and has archived them as historical records so EPA does not needlessly repeat the investigations in the future. This policy change is part of the EPA's *Brownfields Redevelopment Program* to help cities, states, private investors and affected citizens to promote economic redevelopment of unproductive urban sites.

A review of the CERC-NFRAP list, as provided by EDR, and dated 05/15/2002 has revealed that there are 3 CERC-NFRAP sites within approximately 0.5 miles of the target property.

NIPC: NIPC is an inventory of active and inactive solid waste disposal sites, based on state, local government and historical archive data. Included are numerous sites that previously had never been identified largely because, prior to 1971, there was no obligation to register such sites. The data come from the Northeastern Illinois Planning Commission's Solid Waste Landfill Inventory.

A review of the IL NIPC list, as provided by EDR, has revealed that there is 1 IL NIPC site within approximately 0.5 miles of the target property.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Elapsed ASTM days: Provides confirmation that this EDR report meets or exceeds the 90-day updating requirement of the ASTM standard.

FEDERAL ASTM STANDARD RECORDS

NPL: National Priority List

Source: EPA

Telephone: N/A

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 04/22/02

Date Made Active at EDR: 06/21/02

Database Release Frequency: Semi-Annually

Date of Data Arrival at EDR: 05/06/02

Elapsed ASTM days: 48

Date of Last EDR Contact: 05/06/02

Elapsed ASTM days: 46

Date of Last EDR Contact: 05/06/02

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

Source: EPA

Telephone: 703-413-0223

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 05/15/02

Date Made Active at EDR: 08/08/02

Database Release Frequency: Quarterly

Date of Data Arrival at EDR: 06/24/02

Elapsed ASTM days: 45

Date of Last EDR Contact: 06/24/02

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Source: EPA

Telephone: 703-413-0223

As of February 1995, CERCLIS sites designated "No Further Remedial Action Planned" (NFRAP) have been removed from CERCLIS. NFRAP sites may be sites where, following an initial investigation, no contamination was found, contamination was removed quickly without the need for the site to be placed on the NPL, or the contamination was not serious enough to require Federal Superfund action or NPL consideration. EPA has removed approximately 25,000 NFRAP sites to lift the unintended barriers to the redevelopment of these properties and has archived them as historical records so EPA does not needlessly repeat the investigations in the future. This policy change is part of the EPA's Brownfields Redevelopment Program to help cities, states, private investors and affected citizens to promote economic redevelopment of unproductive urban sites.

Date of Last EDR Contact: 06/20/02

ERNS: Emergency Response Notification System

Source: EPA/NTIS
Telephone: 202-280-2342

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 12/31/01
Date Made Active at EDR: 07/15/02
Database Release Frequency: Varies

Date of Data Arrival at EDR: 07/02/02
Elapsed ASTM days: 13
Date of Last EDR Contact: 04/29/02

FEDERAL ASTM SUPPLEMENTAL RECORDS

BRS: Biennial Reporting System

Source: EPA/NTIS
Telephone: 800-424-9346

The Biennial Reporting System is a national system administered by the EPA that collects data on the generation and management of hazardous waste. BRS captures detailed data from two groups: Large Quantity Generators (LQG) and Treatment, Storage, and Disposal Facilities.

Date of Government Version: 12/31/99
Database Release Frequency: Biennially

Date of Last EDR Contact: 06/17/02
Date of Next Scheduled EDR Contact: 09/16/02

CONSENT: Superfund (CERCLA) Consent Decrees

Source: EPA Regional Offices
Telephone: Varies

Major legal settlements that establish responsibility and standards for cleanup at NPL (Superfund) sites. Released periodically by United States District Courts after settlement by parties to litigation matters.

Date of Government Version: N/A
Database Release Frequency: Varies

Date of Last EDR Contact: N/A
Date of Next Scheduled EDR Contact: N/A

ROD: Records Of Decision

Source: EPA
Telephone: 703-416-0223

Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid in the cleanup.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Date of Government Version: 12/21/01
Database Release Frequency: Annually

Date of Last EDR Contact: 07/09/02
Date of Next Scheduled EDR Contact: 10/07/02

DELISTED NPL: National Priority List Deletions

Source: EPA
Telephone: N/A

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 04/22/02
Database Release Frequency: Quarterly

FINDS: Facility Index System/Facility Identification Initiative Program Summary Report

Source: EPA
Telephone: N/A

Facility Index System. FINDS contains both facility information and 'pointers' to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

NPL LIENS: Federal Superfund Liens

Source: EPA
Telephone: 205-564-4267

Federal Superfund Liens. Under the authority granted the USEPA by the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner receives notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

RAATS: RCRA Administrative Action Tracking System

Source: EPA
Telephone: 202-564-4104

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

EDR PROPRIETARY HISTORICAL DATABASES

Former Manufactured Gas (Coal Gas) Sites: The existence and location of Coal Gas sites is provided exclusively to EDR by Real Property Scan, Inc. ©Copyright 1993 Real Property Scan, Inc. For a technical description of the types of hazards which may be found at such sites, contact your EDR customer service representative.

Disclaimer Provided by Real Property Scan, Inc.

The information contained in this report has predominantly been obtained from publicly available sources produced by entities other than Real Property Scan. While reasonable steps have been taken to insure the accuracy of this report, Real Property Scan does not guarantee the accuracy of this report. Any liability on the part of Real Property Scan is strictly limited to a refund of the amount paid. No claim is made for the actual existence of toxins at any site. This report does not constitute a legal opinion.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Oil/Gas Pipelines/Electrical Transmission Lines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines and electrical transmission lines.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 from the U.S. Fish and Wildlife Service.

GEOCHECK®- PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

17770 - CHICAGO, ILLINOIS
E OHIO ST/N FAIRBANKS COURT
CHICAGO, IL 60611

TARGET PROPERTY COORDINATES

Latitude (North):	41.892300 - 41° 53' 32.3"
Longitude (West):	87.620399 - 87° 37' 13.4"
Universal Tranverse Mercator:	Zone 16
UTM X (Meters):	448531.9
UTM Y (Meters):	4637791.0

EDR's GeoCheck Physical Setting Source Addendum has been developed to assist the environmental professional with the collection of physical setting source information in accordance with ASTM 1527-00, Section 7.2.3. Section 7.2.3 requires that a current USGS 7.5 Minute Topographic Map (or equivalent, such as the USGS Digital Elevation Model) be reviewed. It also requires that one or more additional physical setting sources be sought when (1) conditions have been identified in which hazardous substances or petroleum products are likely to migrate to or from the property, and (2) more information than is provided in the current USGS 7.5 Minute Topographic Map (or equivalent) is generally obtained, pursuant to local good commercial or customary practice, to assess the impact of migration of recognized environmental conditions in connection with the property. Such additional physical setting sources generally include information about the topographic, hydrologic, hydrogeologic, and geologic characteristics of a site, and wells in the area.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata. EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

USGS TOPOGRAPHIC MAP ASSOCIATED WITH THIS SITE

Target Property:
Source: USGS 7.5 min quad index

GENERAL TOPOGRAPHIC GRADIENT AT TARGET PROPERTY

Target Property: General East

Source: General Topographic Gradient has been determined from the USGS 1 Degree Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Target Property County</u> COOK, IL	<u>FEMA Flood Electronic Data</u> YES - refer to the Overview Map and Detail Map
Flood Plain Panel at Target Property:	1700740060B / CBPP
Additional Panels in search area:	00000000000 / AOPN

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u> ASHBY	<u>NWI Electronic Data Coverage</u> YES - refer to the Overview Map and Detail Map
---	---

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Site-Specific Hydrogeological Data*:

Search Radius: 2.0 miles
Status: Not found

AQUIFLOW®

Search Radius: 2.000 Miles.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>

40	1 - 2 Miles WNW	Not Reported
F41	1 - 2 Miles WSW	Not Reported

For additional site information, refer to Physical Setting Source Map Findings.

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

ROCK STRATIGRAPHIC UNIT

GEOLOGIC AGE IDENTIFICATION

Era:	Paleozoic	Category:	Stratified Sequence
System:	Silurian		
Series:	Middle Silurian (Niagaran)		
Code:	S2 (decoded above as Era, System & Series)		

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name:	URBANLAND
Soil Surface Texture:	variable
Hydrologic Group:	Not reported
Soil Drainage Class:	Not reported
Hydric Status: Soil does not meet the requirements for a hydric soil.	
Corrosion Potential - Uncoated Steel: Not Reported	
Depth to Bedrock Min:	> 0 inches
Depth to Bedrock Max:	> 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (ln/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	60 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subinvariant soil types may appear within the general area of target property.

Soil Surface Textures:	fine sand fine sandy loam silty clay loam loamy fine sand
Surficial Soil Types:	fine sand fine sandy loam silty clay loam loamy fine sand
Shallow Soil Types:	No Other Soil Types
Deeper Soil Types:	sand

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

loamy sand
fine sand
silty clay loam

ADDITIONAL ENVIRONMENTAL RECORD SOURCES

According to ASTM E 1527-00, Section 7.2.2, "one or more additional state or local sources of environmental records may be checked, in the discretion of the environmental professional, to enhance and supplement federal and state sources... Factors to consider in determining which local or additional state records, if any, should be checked include (1) whether they are reasonably ascertainable, (2) whether they are sufficiently useful, accurate, and complete in light of the objective of the records review (see 7.1.1), and (3) whether they are obtained, pursuant to local, good commercial or customary practice." One of the record sources listed in Section 7.2.2 is water well information. Water well information can be used to assist the environmental professional in assessing sources that may impact groundwater flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the national Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

ADDITIONAL ENVIRONMENTAL RECORD SOURCES

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-260-2805

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-260-2805

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: In November 1971 the United States Geological Survey (USGS) implemented a national water resource information tracking system. This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on more than 900,000 wells, springs, and other sources of groundwater.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

STATE RECORDS

County Well Data in Illinois: Cook and DuPage Counties

Source: Illinois State Geological Survey

Telephone: 217-244-2387

Illinois Private Well Database and PICS (Public, Industrial, Commercial Survey)

Source: Illinois State Water Survey

Telephone: 217-333-9043

Illinois State Geological Survey Water Wells

Source: Illinois State Geological Survey

Telephone: 217-333-5102

Point data set that shows locations, well type, and well ID for wells in Illinois. Data comes from driller's logs.

RADON

Area Radon Information

Source: EPA

Telephone: 303-236-1525

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones

Source: EPA

Telephone: 202-564-9370

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

Electronic Sanborn Map Images USER'S GUIDE

Thank you for your interest in electronic Sanborn Map images. The following are guidelines for accessing the images and for transferring them to your system. If you have any questions about the use of electronic Sanborn Map images, contact your EDR Account Executive at 1-800-352-0050.

Organization of Electronic Sanborn Image File

- First Page Sanborn Map Report, listing years of coverage
- Second Page Electronic Sanborn Map Images USER'S GUIDE
- Third Page Oldest Sanborn Map Image
- Last Page Most recent Sanborn Map Image

Navigating the Electronic Sanborn Image File

- Open file on screen.
- Identify TP (Target Property) on the most recent map.
- Find TP on older printed images.
- Using Acrobat, zoom to 250% in order to view more clearly.
 - 200-250% is the approximate equivalent scale of hardcopy Sanborn Maps.
- Zooming in on an image:
 - On the menu bar, click "View" and then zoom.
 - Use the magnifying tool and drag a box around the TP area.

Printing a Sanborn Map from the Electronic File

- EDR recommends printing all images at 300 dpi (300 dpi prints faster than 600 dpi).
- To print only the TP area, cut and paste the area from Adobe Acrobat to your word processor.

Acrobat Version 4

- Go to the Menu bar
- Press and hold the "T" button
- Choose the Graphics Select Tool
- Draw a box around the area selected
- Go to "Menu"
- Highlight "Edit"
- Highlight "Copy"
- Go to a word processor such as Microsoft Word, paste and print.

Acrobat Version 5

- Go to the Menu Bar.
- Click the "Graphics Select Tool"
- Draw a box around the area selected
- Go to "Menu"
- Highlight "Edit"
- Highlight "Copy"
- Go to a word processor such as Microsoft Word, paste and print.

Important Information about Email Delivery of Electronic Sanborn Map Images

- Images are grouped into one file, up to 2MB.
- In cases where in excess of 6-7 map years are available, the file size typically exceeds 2MB. In these cases, you will receive multiple files, labeled as 1 of 3, 2 of 3, etc. including all available map years.
- Due to file size limitations, certain ISPs, including AOL, may occasionally delay or decline to deliver files. Please contact your ISP to identify their specific file size limitations.

Environmental Data Resources, Inc. City Directory Abstract

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist professionals in evaluating potential liability on a target property resulting from past activities. ASTM E 1527-00, Section 7.3 on Historical Use Information, identifies the prior use requirements for a Phase I environmental site assessment. The ASTM standard requires a review of *reasonably ascertainable standard historical sources*. *Reasonably ascertainable means information that is publicly available, obtainable from a source with reasonable time and cost constraints, and practically reviewable.*

To meet the prior use requirements of ASTM E 1527-00, Section 7.3.4, the following *standard historical sources* may be used: aerial photographs, fire insurance maps, property tax files, land title records (although these cannot be the sole historical source consulted), topographic maps, city directories, building department records, or zoning/land use records. ASTM E 1527-00 requires "*All obvious uses of the property shall be identified from the present, back to the property's obvious first developed use, or back to 1940, whichever is earlier. This task requires reviewing only as many of the standard historical sources as are necessary, and that are reasonably ascertainable and likely to be useful.*" (ASTM E 1527-00, Section 7.3.4, page 12.)

EDR's City Directory Abstract includes a search and abstract of available city directory data.

City Directories

City directories have been published for cities and towns across the U.S. since the 1700s. Originally a list of residents, the city directory developed into a sophisticated tool for locating individuals and businesses in a particular urban or suburban area. Twentieth century directories are generally divided into three sections: a business index, a list of resident names and addresses, and a street index. With each address, the directory lists the name of the resident or, if a business is operated from this address, the name and type of business (if unclear from the name). While city directory coverage is comprehensive for major cities, it may be spotty for rural areas and small towns. ASTM E 1527-00 specifies that a "*review of city directories (standard historical sources) at less than approximately five year intervals is not required by this practice.*" (ASTM E 1527-00, Section 7.3.4, page 12.)

4. SUMMARY

- *City Directories:*

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1923 through 1999. (These years are not necessarily inclusive.) A summary of the information obtained is provided in the text of this report.

This report compiles information by geocoding the subject properties (that is, plotting the latitude and longitude for such subject properties and obtaining data concerning properties within 50 Feet of the subject properties). There is no warranty or guarantee that geocoding will report or list all properties within the specified radius of the subject properties and any such warranty or guarantee is expressly disclaimed. Accordingly, some properties within the aforementioned radius and the information concerning those properties may not be referenced in this report.
